

The SAF-1/4 is designed for use in attaching seismic cable bracing to steel structural members. The limitations of use are governed by the fastener diameter as a 1/4 inch (6mm) fastener is only listed for use with steel, as per NFPA-13. Will accept both metric and imperial fasteners. The cable mount will accept Gold, Orange, or Green cable.

| Material Properties                    |                     |                |
|--|---------------------|----------------|
| Density<br>(x 1000 kg/m <sup>3</sup> ) | Tensile<br>Strength | Yield Strength |
| 7.7 - 8.03                             | 365 (Mpa)           | 305 (Mpa)      |

| Working Load |        |
|--------------|--------|
| UL           | ICC-ES |
| 1,600        | 1,133  |

The SAF maintains the rated break strength of size #GO3 (gold), #OR4 (orange), and #GR6 (green) cable without the need for a thimble. The SAF may be used at both ends of the cable for anchoring equipment. SAFs are offered in 8 mounting sizes (SAF-1/4, SAF-3/8, SAF-1/2, SAF-5/8, SAF-3/4, SAF-7/8, SAF-1, and SAF-1 1/4).
